

Gas Station List

The following pages contain the addresses of gas stations that may have received and may have sold gasoline containing some quantities of elemental sulfur and/or hydrogen sulfide (the "Gasoline"). The Gasoline was in the market for a relatively short time period in May/June 2004. As specified in more detail in the Settlement Agreement Motiva Enterprises LLC, the manufacturer of the Gasoline, has agreed to pay timely filed and documented claims of consumers who purchased the Gasoline during certain time periods from one or more of the stations listed. The inclusion of any particular station on the list does not necessarily mean that the station actually sold the Gasoline during the time period.

To the extent that any one of the stations may have sold the Gasoline, the station and its personnel would not have known of the problem with the Gasoline and the potential impact that the Gasoline could have on certain makes and models of cars, trucks and other vehicles until Motiva became aware of the problem in late May 2004 when it suspended sales in these markets and issued media and consumer advisories. The potential or actual sale of the Gasoline by one of the stations listed did not affect the fuels sold by the station both before and after this event.
